TeamCall CA NFON – Release Notes

Release 1.2

Release date: 2026-11-17

Bugfix

- Improved the handling of cases where events are no longer received on the connection to the NFON system. (#14355)
  The reconnect attempt will now also work in cases where it previously did not have the intended effect.

Release 1.1.1

Release date: 2026-10-15

Bugfixes

Signaling

- Improved the bugfix of release 1.1 by fixing a second bug that also prevented terminated calls in ringing groups to be correctly recognized for all group member devices. (#14307)
- Fixed a regression of release 1.1 that could have prevented the service from shutting down properly on Windows. (#14311)

Release 1.1

Release date: 2026-10-07

Security

- Updated third party libraries, addressing five potential vulnerabilities.

Changes

Installation

- Made a large number of improvements to the Windows and macOS install scripts. (#14230, #14232, #14233, #14238, #14239, #14275)
- Windows installation now requires a 64-Bit JVM. (#14231, #14237)

Bugfixes

Signaling

- Fixed a bug that prevented terminated calls in ringing groups to be correctly recognized for all group member devices. (#14274)

Log file

- Fixed a bug that could have caused the log file to grow extremely fast. (#14272)

Documentation

- Major update of the Admin guide. (#14198)
  This includes the addition of a section describing limitations in signaling caused by the current state of the NFON API.
