

TeamCall® Audio Conferencing for IBM Lotus Sametime

Improve Your Quality Of Collaboration

One click and your
conference call starts
out of **Lotus®** Sametime®

User Benefits

- Simple to start
- Ease of use
- Fast communication
- Effective collaboration

Business Value

- Increased productivity
- Enhanced flexibility
- Standards based, allowing reuse of existing phone system infrastructure
- Savings on conference expenses

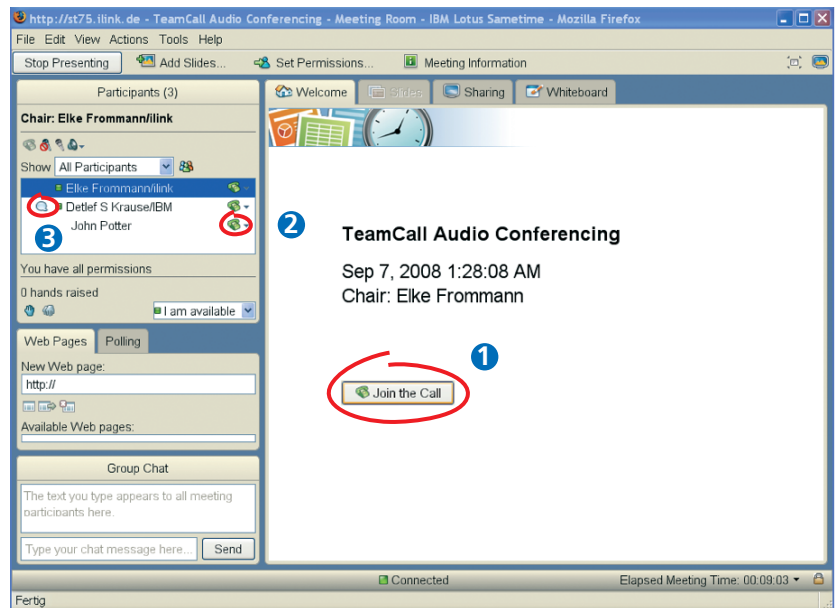

Telephone Conference Calls, Integrated In Lotus Sametime Web Conferences

- 1 Participate in scheduled and ad hoc conference calls with a single click

- 2 Overview of participants – the telephone icon shows who participates

- 3 An active speaker icon provides feedback on who is speaking

Features

The integrated conference bridge calls the participants to comfortably bring them into the conference call.

The moderator is able to control all aspects of the audio conference.

- Dial out
- Disconnect participants
- Rename users
- Mute individual participants
- Mute all participants
- Associate the selected user
- Lock conference
- Start and stop conference

Technical Requirements

- IBM Lotus Sametime Release 7.5.1 or higher
- Linux server (for the conference bridge) with LAN access and connectivity to your phone system via SIP
